DEFINITION

GOLDMEHL® FM hydrolysed is an environmentally friendly and sustainable special raw material. GOLDMEHL® FM hydrolysed is produced under gentle process conditions (Low Temperature Drying Technology), originated from feathers. GOLDMEHL® FM hydrolysed is fully aqua bio-secure; because of its origin (non-aquatic sources), extremely low content of unwanted substances (such as heavy metals, dioxin), and absence of antibiotic growth promoters. GOLDMEHL® FM hydrolysed derives from fully healthy animal by-products, which are considered by veterinarians to be Cat. III material, EU 1069/2009.
